PROJECT :

**RESIDENTIAL PLOTTED
DEVELOPMENT AT
SECTOR-78, GURUGRAM**

ARCHITECT :

1. All General Notes as per sheet LG-001 are applicable to this drawing sheet.

2. Do not Scale Drawings Dimensions govern.

3. All dimensions are in millimeters unless noted otherwise. Only the spot grades mentioned in grading layout are in meters.

4. All dimensions are from finished to finished levels unless otherwise specified.

5. All Levels are Finished level unless otherwise specified.

6. In case of discrepancies larger scale detailed drawings shall supersede smaller scale drawings.

7. Any discrepancy in between Plan, Elevation, Section shall be immediately brought to Landscape Architect's notice prior to construction on site.

8. Any discrepancy between Landscape Architecture, Architecture, Structure, MEP, Facade other drawings shall be immediately brought to Architects notice prior to construction on site.

9. Any irregularities in construction which might occur as a result of discrepancy between Landscape Architecture, Architecture, Structure, MEP, other drawings which have not been brought to the Architects notice prior to execution shall become the responsibility of the Contractor.

10. All services (MEP) drawings are to be referred only for technical content - only coordinated working drawings to be followed for all work at site.

11. This drawing shows the design intent only. However, all structural sizes and details to be referred from drawings schedules given by structure consultants. However, profile coordinates to be strictly as per landscape architectural drawings.

12. Respective consultants/vendors to provide shop drawings for fabrication details and all the water related elements/features.

13. Civil work execution drawings, structural details and service related execution drawings to be issued by the Structural and MEP consultants. These will be coordinated with LA drawings.

14. Irrigation details and specification along with final irrigation layout to be issued by the Irrigation consultant. This drawings needs to be in sync with the landscape drawings and layouts.

15. All relevant samples to be approved by landscape architect prior to procurement.

16. No Shop drawings issued by any agency/consultant is valid for construction unless stamped and signed by landscape architect along with comments if any.

17. All drain tiles and perforated drain pipes need to be connected to the storm water system as given by the MEP consultant.

18. For softscape & landscape specification refer sheet LG-003 & L-003.

19. Install paver courses in straight, true lines/arc.

20. Provide expansion joint where paving meets other types of paving, curbs, and/or walls, and as directed by architect.

21. Contractor needs to provide mockups on site for flooring patterns, coping/cladding details or any other details that may be required as per landscape architect's request. Construction should start only after approval of these mockups by the Landscape architect.

22. Supervision if specifically asked would be provided but the responsibility regarding correct & sound construction shall solely rest with contractor/builder.

23. Soil depth for trees/shrubs and groundcovers - as available on site.

24. Minimum soil depth required for lawn is 0.25 - 0.25 m.

25. All wall surfaces coming in contact with planting soil need to be waterproof plastered. Plaster thickness for wall cladding is 15mm thick.

26. For chamber cover type and color to be finalized in coordination with landscape consultant.
