PLOTTED DDJAY COLONY AT GURUGRAM

SUBMISSION REPORT

Estimate for providing external services i. e. water supply, sewerage and storm water drainage irrigation system for landscaping, road and street lighting for Proposed Residential Plotted Colony (DDJAY - 2016) area measuring 3.25 Acres (License no. 5 of 2023) in addition to 7.35 Acres (License no. 126 of 2022) in total area measuring 10.625 Acres being developed by GCC INFRA at Sector - 88A, Gurugram, Haryana.

Report on Complex:

The proposed site for complex is located in Gurugram, Haryana. The above-mentioned housing is being developed and constructed by M/S GCC INFRA.

WATER SUPPLY:

At present the source of water supply in this area is borewell. As the underground water is potable, provision for one number of Borewells have been made in this estimate. It has been proposed to construct underground tanks of capacity as per attached details, and at location for domestic purpose. The underground tanks will be fed from the borewells and HUDA supply, from there water will be pumped to plots proposed. The water supply system has been designed as per the Hazen Willian formula.

DESIGN:

The scheme has been designed for population of approx. 3276 persons considering 18 persons for each plot. The rate of water supply per head/day has been taken as 135 liters per head per day as per HUDA Norms including flushing water supply.

PUMPING EQUIPMENTS:

It has been proposed to install pumping set as described with standby of equal capacity. The provision for standby generating set has also been provided in case of any electricity failure.

SEWERAGE SCHEME:

This scheme is designed for sewer connecting to Master Sewer of HUDA Main Scheme. The Sewerage System has been marked on the respective plans.

Sewer lines have been designed for three times average D.W.F. in relation to water supply demand. It has been assumed that about 75% of the domestic water supply shall find its way into the proposed sewer. Sewer lines shall be laid to a gradient maintaining minimum 2.46 ft./Sec self-cleaning velocity. Sewer line up to 400 mm dia. has been designed to run half full and above 400 mm dia. has been designed to run three fourth full at peak flow. Necessary provision for laying S.W./RCC pipe sewer line, construction of required number of manholes etc., have been made in the estimate.

Necessary design statement for entire sewerage system has been prepared and attached with estimate. Manning's formula has been used on the design of sewerage system.
