M/s AMEYA COMMERCIAL PROJECTS PVT LTD Gurugram, Haryana. Ameya One, Golf Course Road, DLF City-V, Sector-42

Subject: E

Haryana. Sector-84, Environment Clearance for Commercial Colony Gurugram-Manesar Urban Complex, District-Gurugram, Village-Hayatpur,

response to the observations of the State Expert Appraisal Committee (SEAC) in its viz., Form-1, Notification, 2006 on the basis of the mandatory documents enclosed with the application received on 30.05.2019, under the EIA Notification, meeting held on 27.06.2019 awarded "Gold" rating / grading to the project Environmental Clearance as This letter per prescribed Form 1-A, Conceptual Plan and additional S. for the above project addressed to M.S. SEIAA, in reference procedure E, Ö the your application for seeking light of provisions under the 2006. The clarifications proposal has been furnished Haryana prior

Gurugram, Haryana. The details of the project are given below: Colony Village-Hayatpur, is inter-alia, noted that the project involves the proposed Commercial Sector-84, Gurugram-Manesar Urban Complex, District-

Category	8 (a) "Building & Construction Projects"
Gross Plot area (Sq. m.)	10,319.46
Green area (Sq. m.)	2,078.33
Built up area (Sq. m.)	31,223.691
No. of floors/Max. ht. (m)	2B+G+3/23.5
Estimate population	6299 Persons
Ground coverage (Sq. m.)	5,705.12
Total Water Requirement (KLD)	260
Fresh water (KLD)	65
Recycled/ treated water requirement (KLD)	195
Waste water generation (KLD)	123
Capacity of STP (KLD)	150 KLD (80 KLD & 70 KLD)
RWH Pits	3 Nos.
Total Parking (ECS)	376
Total Solid waste (TPD)	1.171
Sludge from STP (kg/day)	12
OWC	I No.
Power Requirement (KW)	1,838.48 (DHBVN)
D.G Sets (kVA)	2,770
No. of DG Sets	3 nos. of DG sets $(2x1010 \text{ kVA} + 1x750 \text{ kVA})$

Project cost	65 Crores
CER	1.3 Crores

Notification 2006 subject to the strict compliance with the following stipulations accord necessary environmental clearance for the project under meeting held conditions. Accordingly, the State Environment Impact Assessment Authority in its 119th clearance for the project mentioned above, subject to compliance with the stipulated furnished in response to its observations, have recommended the grant of environmental the relevant documents submitted by the project proponent and additional clarification w on 02.08.2019 decided to agree with the recommendations of SEAC to The State Expert Appraisal Committee, Haryana after due consideration of Category 8(a) of EIA

A. Specific conditions:

- Sewage shall be treated in the STP based on MBBR Technology with be recycled /reused for flushing. DG cooling, Gardening and HVAC tertiary treatment i.e. Ultra Filtration. The Treated effluent from STP
- 12 waste water being used for flushing in terms of faecal coli forms and other the State Pollution Control Board so as to continuously monitor the treated The Project Proponent would devise a monitoring plan to the satisfaction of pathogenic bacteria.
- S implementation of conditions related to quality and quantity of recycle and through spray faucets attached to toilet seats. waters and fresh waters for flushing, and quality of water being supplied comparative bacteriological studies from toilet seats using recycled treated reuse of treated water, efficiency of treatment systems, quality of treated Project Proponents would commission a third party study on the being supplied for flushing (specially the bacterial counts),
- wet garbage for facilitating segregation of waste. Solid Waste shall be segregated into Separate wet and dry bins must be provided in each unit and at ground level composting. The inert waste from the project will be sent to dumping site. management within the premises which will include area for segregation, wet garbage and inert materials. Wet Garbage shall be composted in Organic waste convertor. Adequate area shall be provided for solid waste
- radius of the site in different scenarios of space and time purpose to be carried out by the project or other agencies in this 05kms impact of all development and increased habilitation being carried out or the implementation of the project. This plan should be based on cumulative within a 05 kms radius of the project is marinated and improved upon after shall be drawn up to ensure that the current level of service of the roads spirit. Apart, a detailed traffic management and traffic decongestion plan Traffic management plan as submitted shall be implemented in letter and
- 9 with the local building byelaws. commencement of work. All the construction shall be done in accordance The Project Proponent shall obtain all necessary clearance/permission from agencies including town planning authority
- 7 of pollution) Act, 1981 and the Water (Prevention and control of pollution) Pollution Control Board as required under the Air (Prevention and Control Consent to establish/operate for the project shall be obtained from the State
- The Approval of the Competent Authority shall be obtained for structural safety of building code due to earthquakes, adequacy of firefighting

- measures from lightening etc. per National Building Code including protection
- 9 the start of the project. The PP shall submit the documents for approval of 3% extra FAR before
- 10. sewage connection permitted by the competent authority. The PP shall not give occupation or possession before the water supply and
- 11. connection permitted by the competent Authority shall not give occupation or possession before the electricity
- 12. from CGWA before the start of the project and also obtained the CTO from HSPCB after the approval from CGWA. The PP shall obtain the permission regarding withdrawal of ground water
- <u>u</u> stakeholders of the commercial colony/project. The PP shall carry out the quarterly social awareness programs for the
- 14. recharge and carry out quarterly maintenance and cleaning of RWH pits The PP shall install Digital water level recorder for monitoring the water

B. Statutory compliance:

- shall be done in accordance with the local building byelaws coverage, FAR and should be in accordance with zoning plan approved by all relevant agencies The project proponent shall obtain all necessary clearance/ permission from Competent Authority before commencement of work. All the construction including town planning authority for ground
- [2]safety of buildings due to earthquakes, adequacy of firefighting equipment lightening etc. etc as The approval of the Competent Authority shall be obtained for structural per National Building Code including protection measures
- [3]non-forest purpose involved in the project. The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for
- [4] The project proponent shall obtain clearance from the National Board Wildlife, if applicable. for
- 2 State Pollution Control Board. provisions of Air (Prevention & The project proponent shall obtain Consent to Establish/Operate under the Water (Prevention & Control of Pollution) Act, 1974 from the Control of Pollution) Act, 1981 Haryana and the
- [6] ground water /surface water required for the project from the competent The project proponent shall obtain the necessary permission for drawl of
- [7] power to the project along with the load allowed for the project should be A certificate of adequacy of available power from the agency supplying obtained
- 8 respective competent authorities. Department shall be obtained, as applicable, by project proponents from the All other statutory clearances such as the approvals for storage of diesel Chief Controller of Explosives, Fire Department, Civil Aviation
- [9] 2016 shall be followed (Management) Rules, 2016, and the Plastics Waste (Management) Rules, provisions of the Solid Waste (Management) Rules, 2016, e-Waste

[10]bylaws of the State Government. by Bureau of Energy Efficiency, Ministry of Power strictly in addition of The project proponent shall follow the ECBC Act/ECBC-Rules prescribed

I. Air quality monitoring and preservation

- shall be complied with. and Demolition Activities for projects requiring Environmental Clearance Mandatory Implementation of Dust Mitigation Measures for Construction Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding
- E current exceedance in ambient air quality at the site. A management plan shall be drawn up and implemented to contain the
- E during the construction period. released (e.g. PM10 and PM25) covering upwind and downwind directions monitoring for common/criterion parameters relevant to the main pollutants The project proponent shall install system to carryout Ambient Air Quality
- iv) the height needed for the combined capacity of all proposed DG sets. Use of ultra low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board be of enclosed type and conform to rules made (Protection) Act, power generating sets proposed as source of backup power should 1986. The height of stack of DG sets should be equal to under the
- 5 well as taking out debris from the site. other construction materials prone to causing dust pollution at the site as covers shall be provided for vehicles bringing in sand, cement, murram and walls all around the site (at least 3 meter height). Plastic/tarpaulin sheet screens for the building under construction, continuous dust/ wind breaking provided for the building as well as the site. These measures shall include Construction site shall be adequately barricaded before the construction Dust, smoke & other air pollution prevention measures shall be
- (IV adequately so as to prevent dust pollution. murram, loose soil, cement, stored on site shall be covered
- vii) Wet jet shall be provided for grinding and stone cutting
- VIII) Unpaved surfaces and loose soil shall be adequately sprinkled with water to
- X. the provisions of the Construction and Demolition Waste Rules 2016. disposed. All demolition and construction waste shall be managed as per All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly
- × prescribed for air and noise emission standards. low sulphur diesel type and shall conform to Environmental (Protection) diesel generator sets to be used during construction phase shall be ultra
- X. the provisions of the Central Pollution Control Board (CPCB) norms stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Ultra low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per gaseous emissions from DG set shall be dispersed through adequate
- For indoor air quality the ventilation provisions as per National Building Code of India.

I. Water quality monitoring and preservation

- 1 flow of water. No construction shall be allowed to obstruct the natural swales, landscape, and other sustainable urban drainage systems (SUDS) drainage through the site, on wetland and water bodies. Check dams, bioare allowed for maintaining the drainage pattern and to harvest rain water. The natural drain system should be maintained for ensuring unrestricted
- possible. Minimum cutting and filling should be done. Buildings shall be designed to follow the natural topography as much as

- iv) shall be measured and recorded to monitor the water balance as projected Office, MoEF&CC along with six monthly Monitoring reports. by the project proponent. The quantity of fresh water usage, water recycling and rainwater harvesting in the project details The record shall be submitted to the Regional
- 5 specified separately for ground water and surface water sources, ensuring project under consideration and the balance water available. This should be quantity of water already committed the quantity of water allotted to the specifying the total annual water availability with the local authority, the that there is no impact on other users. certificate shall be obtained from the local body supplying
- VI) shall be pervious. Use of Grass pavers, paver blocks with at least 50% At least 20% of the open spaces as required by the local building bye-laws opening, landscape etc. would be considered as pervious surface.
- Vii) Installation of dual pipe plumbing for supplying fresh water for drinking, landscape irrigation, car washing, thermal cooling, conditioning etc. shall cooking and bathing etc and other for supply of recycled water for flushing,
- viii) incorporated in the building plan. of low flow faucets tap aerators etc) for water conservation shall be Use of water saving devices/ fixtures (viz. low flow flushing systems; use
- (XI plumbing system. In case of single stack system separate recirculation lines Separation of grey and black water should be done by the use of dual
- X for flushing by giving dual plumbing system be done.

 Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
- X. Model Building and recharge should be followed as per the Ministry of Urban Development If local byelaw provision is not available, pits/storage tanks shall be provided for ground water recharging as per the The local bye-law provisions on rain water harvesting should be followed Byelaws, 2016. 03 Rain water harvesting adequate provision for storage recharge
- XII) storage capacity of minimum one day of total fresh water requirement shall of minimum one recharge bore per 5,000 square meters of built up area and water should be harvested and stored for reuse. The ground water shall not be provided. In areas where ground water recharge is not feasible, the rain A rain water harvesting plan needs to be designed where the recharge bores be withdrawn without approval from the Competent Authority.
- xiii) All recharge should be limited to shallow aquifer.
- xiv) No ground water shall be used during construction phase of the project.
- (VX abstraction or dewatering. Formal approval shall be taken from the CGWA for any ground water conform to the approvals and the ground water dewatering should be properly managed and shall guidelines of the CGWA in the matter.
- xvi) shall be measured and recorded to monitor the water balance as projected Office, MoEF&CC along with six monthly Monitoring reports. by the project proponent. The record shall be submitted to the Regional The quantity of fresh water usage, water recycling and rainwater harvesting
- xvii) Sewage shall be treated in the STP with tertiary treatment. municipal drain. effluent from STP shall be recycled/re-used for flushing, AC make up water gardening. As proposed, no treated water shall be disposed in to
- xviii) No sewage or untreated effluent water would be discharged through storm water drains.
- xix) Onsite sewage treatment of capacity of treating 100% waste water to be certified by an independent expert and a report in this regard shall be installed. The installation of the Sewage Treatment Plant (STP) shall be

statutory norms notified by Ministry of Environment, Forest and Climate tower, and other end-uses. Excess treated water shall be discharged as per submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling Change. Natural treatment systems shall be promoted.

(XX problem from STP. conducted. Periodical monitoring Necessary measures should be made to mitigate the odour of water quality of treated sewage shall be

XXI) Systems, 2013 Development, Sludge from the onsite sewage treatment, including septic tanks, shall be collected, Organization conveyed (CPHEEO) Manual on Sewerage and Sewage Treatment Central Public and disposed Health as and per Environmental the Ministry Engineering of Urban

III. Noise monitoring and prevention

- <u>ı</u> SPCB. measures shall be made to reduce ambient air and noise level during quality shall be closely monitored during construction phase. Adequate Rules, 2000. both during day and night as per Noise Pollution (Control and Regulation) construction phase, so as to conform to the stipulated standards by CPCB Ambient noise levels shall conform to residential area/commercial area Incremental pollution loads on the ambient air and noise
- Ξ as a part of six-monthly compliance report. report in this regard shall be submitted to Regional Officer of the Ministry Noise level survey shall be carried as per the prescribed guidelines and
- E) plugs for operating personnel shall be implemented as mitigation measures Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear for noise impact due to ground sources.

IV. Energy Conservation measures

- <u>.,</u> their own ECBC, shall comply with the State ECBC also which is no case less than 25% as prescribed. Rules, 2018 shall be ensured. Buildings in the States which have notified Bureau of Energy Efficiency with the Energy as per ECBC Act, 2017 read with ECBC Conservation Building Code (ECBC) of
- ii) Outdoor and common area lighting shall be LED.
- E buildings day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof R & U-values shall be as per Concept of passive solar design that minimize energy consumption in ECBC specifications. landscaping, efficient building envelope, appropriate fenestration, increased by using design elements, such 2S building orientation,
- ĮV) design and should be in place before project commissioning. lighting the area outside the building should be integral part of the project conservation measures like installation of CFLs/ LED for the
- 4 local building bye-laws requirement, whichever is higher.

 Solar power shall be used for lighting in the apartment to reduce the power generation equivalent to 1% of the demand load or as per the state level Solar, wind or other Renewable Energy shall be installed to meet electricity
- (<u>F</u> building as possible. recommended to meet its hot water demand from solar water heaters, as far commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also water heating shall be provided to meet 20% of the hot water demand of the load on grid. Separate electric meter shall be installed for solar power. Solar bye-laws,

tarill cubmit

requirement and submit quantification saving report for each

V. Waste Management

- <u>"</u> indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained A certificate from the competent authority handling municipal solid wastes,
- E) in approved sites with the approval of competent authority. necessary precautions for general safety and health aspects of people, only Disposal of muck during construction phase shall not create any adverse neighboring communities and be disposed taking
- E) level for facilitating segregation of waste. Solid waste shall be segregated Separate wet and dry bins must be provided in each unit and at the ground
- (VI 0.5 kg /person/day must be installed. Leaves to be put in earmarked pits for into wet garbage and inert materials.

 Organic Waste Converter within the premises with a minimum capacity of converting them into compost to be used as manure.
- 5 for which a written tie up must be done with the authorized recyclers. All non-biodegradable waste shall be handed over to authorized recyclers
- <u>v</u>. the State Pollution Control Board. disposed off as per applicable rules and norms with necessary approvals of Any hazardous waste generated during construction phase, shall be
- Vii) material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly construction materials, shall be required for at least 20% of the construction environment friendly materials. environment friendly Gypsum blocks, Compressed earth blocks, materials in bricks, blocks and other
- viii) used in building construction. provision of Fly Ash Notification of September, 1999 and amended as on Fly ash should be used as building material in the construction as per the 27th August, 2003 and 25th January, 2016.Ready mixed concrete must be
- X. Rules, 2016. be managed so as to strictly conform to the Construction and Demolition Any wastes from construction and demolition activities related thereto shall
- × recycling as per the prevailing guidelines/ rules of the regulatory authority Used CFLs and TFLs should be properly collected and disposed off/sent for to avoid mercury contamination.

/I. Green Cover

- absolutely necessary, tree felling shall be with prior permission from the Plantations to be ensured species (cut) to species (planted). concerned regulatory authority. Old trees should be retained based on girth and age regulations as may tree can be felled/transplant unless exigencies demand. be prescribed by the Forest Department. Where
- $\widehat{\Xi}$ A minimum of 1 tree (5' tall) for every 80 sqm of land should be planted with heavy foliage, landscape planning should include plantation of native species. The species Water intensive and/or invasive species should not be used for landscaping. The existing trees will be counted for this purpose. The broad leaves and wide canopy cover are desirable.
- (iii)local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting belt development shall be provided as per the details provided in the project Plantations to be ensured species (cut) to species (planted). Area for green of 10 trees for every 1 tree that is cut) shall be done and maintained Where the trees need to be cut with prior permission from the concerned
- (iv) appropriately in designated areas and reapplied during plantation of the buildings, roads, paved areas, and external services. It should be stockpiled Topsoil should be stripped to a depth of 20 cm from the areas proposed for

proposed vegetation on site Transport

VII.

- Ξ and private networks. Road should be designed with due consideration for A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, these basic criteria. environment, and safety of users. The road system can be designed with
- pedestrian Hierarchy Of traffic. roads with proper segregation of vehicular and
- b) Traffic calming measures.
- c) Proper design of entry and exit points.
- d) Parking norms as per local regulation.
- Ξ during non-peak hours. conform to applicable air and noise emission standards be operated only good condition and should have a pollution check certificate and should Vehicles hired for bringing construction material to the site should be in
- (iii) augmentation and shall also have their consent to the implementation of management plan shall be duly validated and certified by the State Urban radius of the site in different scenarios of space and time and the traffic up to ensure that the current level of service of the roads within a 05 kms components Development proposed to be carried out by the project or other agencies in this 05 Kms impact of all development and increased habitation being carried out or implementation of the project. A detailed traffic management and traffic decongestion plan shall be drawn the department and the project is the plan which maintained and improved This plan should be based on cumulative P.W.D./ competent authority for road involve the participation noqu

VIII. Human health issues

- Ξ unloading, working in any area with dust pollution shall be provided with dust mask. All workers working at the construction site and involved in loading, carriage of construction material and construction debris
- Ξ For indoor air quality the ventilation provisions as per National Building Code of India.
- (iii) Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.
- (iv) Provision shall be made for the housing of construction labour within the after the completion of the project. etc. The housing may be in the form of temporary structures to be removed mobile toilets, mobile STP, safe drinking water, medical health care, crèche site with all necessary infrastructure and facilities such as fuel for cooking,
- \leq Occupational health surveillance of the workers shall be done on a regular
- (¥) and operations of the project A First Aid Room shall be provided in the project both during construction

IX. Corporate Environment Responsibility

- Ξ applicable, regarding Corporate Environment Responsibility. Ministry's The project proponent shall comply with the provisions contained in this OM vide F.No. 22-65/2017-IA.III dated 1st May 2018,
