[illegible][illegible][illegible]

The diagram shows a person's head, neck, and torso represented by a series of connected segments. As the person tilts forward, the horizontal distance from the center of gravity to the base of support (CG-BAS) increases. This increase leads to a decrease in the stability margin (SM), which is shown as a downward-sloping curve. The diagram is divided into three regions: 'Vertical' (top), 'Tilted' (middle), and 'Falling' (bottom). A red dashed line marks the transition from 'Tilted' to 'Falling'.
